## Big Block Chevrolet Range

PIB039/2022

**ACL now offers a full range of Big Block Chevrolet performance engine bearings:**

### Rod Bearings:

- 8B743H** Standard width shells with enlarged chamfers – for crankshafts with mild fillet radii.
- 8B743HD** As above but with a Dowel hole in the lower shell for Aluminum rods.
- 8B743HXXD** Can't get enough clearance – this set will give an extra .002" from STD.
- 8B743HND** Narrowed rod bearings for crankshafts with more extreme fillets.

ACL recommends using the standard width sets wherever practical, unless the crankshaft demands the use of a narrowed set.

### Main Bearings:

- 5M829H** For standard applications
- 5M829HN** For extreme applications – narrowed intermediates for large fillet crankshafts, and two extra oil holes for improved rod bearing lubrication.

### Coated or Un-Coated

ACL also offers a range of the above parts in our coated range, coated by Calico in their premier CT-1 dry film lubricant.
